

COVID CASES - GREEN BAY HIGH SCHOOL

23 August 2021

Tenā koutou e te whānau,

We have recently been informed that there has been an identified case of COVID-19 at Green Bay High School.

Oaklynn has a satellite of 4 classes at Green Bay High.

I have been in close contact with Principal of Green Bay High School - Fiona Barker during the course of today and the message from the Auckland District Health Board states that;

“All of Te Aratika will still be considered as Casual contacts and not require testing unless symptomatic”

If you have any concerns please don't hesitate to contact us office@oaklynn.school.nz

Ngā mihi nui

Louise Doyle

Principal

Oaklynn School

PLEASE FOLLOW THE GUIDELINES BELOW

Actions for contacts

	Description	Actions for the contact	Actions for secondary* contacts
Close Contact	People who may live or work with or have been in the same place at the same time as someone infectious with COVID-19.	<ul style="list-style-type: none"> ● Isolate/quarantine, either at home or in a managed facility, for 14 days from last exposure. ● Test immediately (unless it's within 1 day of your next scheduled test), and on day 5 after last exposure and day 12 after last exposure. ● If COVID-19 symptoms develop, get an additional test immediately. 	<ul style="list-style-type: none"> ● If the Close Contact develops COVID-19 symptoms, their household member(s) should stay at home until the Close Contact returns a negative test result (following symptom onset). ● If one or more household member(s) of the Close Contact develop COVID-19 symptoms, they should stay at home and get a test.
Casual Plus Contact	People who have been in the same place at the same time as someone infectious with COVID-19, but have not had enough exposure to be a Close contact.	<ul style="list-style-type: none"> ● Stay at home, get a test around Day 5 after last exposure and remain at home until a negative test result is received. ● Self-monitor for COVID-19 symptoms for 14 days. ● If COVID-19 symptoms develop, get a test immediately and stay at home until negative test result is received. 	<ul style="list-style-type: none"> ● No action unless the household member develops COVID-19 symptoms.
Casual Contact	People who have been in the same place at the same time as someone infectious with COVID-19, but may not have been near the person.	<ul style="list-style-type: none"> ● Self-monitor for COVID-19 symptoms for 14 days. ● If COVID-19 symptoms develop, get tested and stay at home until negative test result is received. 	<ul style="list-style-type: none"> ● No action.

Actions for secondary contacts

***A secondary contact is, for example, a household contact or someone that has had significant contact with a Close Contact.**

If you have been in contact with a person who has been asked to isolate because they were in a location of interest you do not need to stay home or get tested. However, if the contact or a household member becomes symptomatic, you need to stay at home or in your accommodation until they return a negative test result.

If you've been in contact with a person who has been asked to stay at home and get a test after five days, you do not need stay at home or get tested.

If you become symptomatic yourself, get tested and stay at home or in your accommodation until you receive a negative test result.

Guidance is also available on the [Unite Against COVID-19 website](#).
